

ARJUN PAWAR

+91-9822193753 | arjunp0023@gmail.com | [Arjun's Portfolio](#)

 [Arjun Pawar](#) |  [Arjun0023](#)

SKILLS

- **Programming Languages:** TypeScript, JavaScript, Python
- **Web Technologies:** ReactJs, React Native, NextJs, NodeJs, ExpressJs, FastAPI
- **Database Systems:** MongoDB, ChromaDB, Milvus, PineconeDB
- **Cloud Technologies:** AWS, Azure, CloudFlare, Docker
- **DevOps & Version Control:** Git, GitHub
- **Specialized Area:** FullStack Development, Prompt Engineering, Artificial Intelligence
- **Other Tools & Technologies:** MixPanel, PlayWright, Linux

EXPERIENCE

- **SDE – AI Engineer at Fynd |  Ratl AI** June 2025 – Present
Mumbai, Maharashtra
 - Building **Ratl AI**, an **autonomous load testing AI agent** developed at **Fynd**, capable of designing, executing, and analyzing load tests.
 - Designed AI workflows using **LangGraph** to orchestrate intelligent agent behavior for test planning, execution, and performance analysis
 - Developed scalable backend services using **Python FastAPI** and **Spring Framework** to handle test orchestration, metrics collection, and result processing
 - Built interactive dashboards and user interfaces using **Next.js** for configuring tests and visualizing performance insights
 - Deployed and managed services on **Kubernetes**, ensuring scalability, fault tolerance, and high availability
 - Integrated **MongoDB** and **Redis** for efficient data storage, caching, and real-time state management
 - **Technologies:** LangGraph, Python, FastAPI, Next.js, Spring Framework, Kubernetes, MongoDB, Redis
- **Full Stack Developer Intern at ClickToCRM | ** April 2024 – June 2025
Bangalore, Karnataka
 - Contributed as a **founding engineer** to an **AI SaaS product** reducing sales executives' workloads
 - Built an **AI insights engine** using **RAG techniques** and **Gemini 2.0 Flash** for real-time analysis of customer interactions
 - Designed and integrated **vector database** systems (**ChromaDB, Milvus**) for efficient **semantic search** over customer call transcripts
 - Developed **data visualization** modules with **MongoDB** integration for actionable analytics
 - Created a cross-platform **mobile app** using **React Native** to extend product accessibility
 - Built responsive **ReactJS** frontend for AI-driven **CRM system**
 - Enhanced backend efficiency using **FastAPI** and integrated with the **Simple Salesforce API**
 - Developed **AI Notes** using **Meta Llama-3.3-70B** to summarize sales calls and manage tasks automatically
 - Conducted comprehensive **debugging, testing, and peer reviews** to ensure product quality
 - Integrated **Mixpanel** for product analytics and user behavior tracking
 - **Technologies Used:** React, React Native, Python, FastAPI, MongoDB, ChromaDB, Milvus, Gemini 2.0, Llama-3.3-70B, RAG, Mixpanel, Salesforce API, Git, JavaScript
- **Software Developer Intern at Panora | ** March 2024 – April 2024
Remote
 - Developed backend for a **decentralized exchange platform**, enhancing **transaction security** by 40% and reducing latency
 - Created a **Node.js** and **MongoDB**-based referral system, increasing user acquisition by 35%
 - Built a **Python SDK** on the **Aptos blockchain**, cutting token swap times by 45%
 - **Technologies:** Node.js, MongoDB, Python, Aptos, RESTful APIs, Git

• Frontend Developer Intern at Lamarr

February 2024 – March 2024

- Built **responsive UI components** using **NextJS**, **TypeScript**, and **TailwindCSS**, improving mobile Remote engagement by 35%
- Integrated **PostgreSQL** via **Supabase**, enhancing query performance by 50% and reducing storage costs
- Configured **Nginx** for three production domains, achieving 99.95% uptime and reducing global latency by 65%
- **Technologies:** NextJS, TypeScript, TailwindCSS, PostgreSQL, Supabase, Nginx

HACKATHONS

• DataPilot AI (Hacktimus – Runner Up)

May 2025

Tools: Fynd FDK, FastAPI, Gemini 2.0 Flash, Render, Boltic, Node.js, Python

- Built an AI-powered **data assistant for Fynd sellers**, enabling users to ask questions in natural language and receive instant insights
- Automatically generated **charts and dashboards** in real time based on seller data without requiring BI tool expertise
- Empowered users to make **data-driven decisions** through conversation-like interactions, acting as a **virtual data scientist**
- Allowed saving and customizing charts for quick dashboard creation in minutes
- Achieved **runner-up position** among 200+ participants 20+ teams in Hacktimus 2025

• Splunk Query Assistant (Codejam - Winner)

April 2025

Tools: React, FastAPI, Docker, Gemini 2.0 Flash

- Created a tool that translates **natural language questions into Splunk queries** aligned with CIM models
- Enabled non-technical users to write complex queries by simply describing what they need in plain English
- Used **Gemini 2.0 Flash** to interpret user input and dynamically construct valid Splunk queries
- Packaged and deployed the app using **Docker** for scalability and ease of deployment

PROJECTS

• AutolyticsAI: AI-Powered Data Analytics Platform

November 2024 - January 2024

Tools: React, Tailwind CSS, FastAPI, Pandas, Python, Gemini 2.0 Flash, Prompt Engineering

- Developed a **no-code analytics solution** enabling users without technical expertise to generate meaningful insights from data without specialized skills or investment
- Implemented **natural language processing** technology that converts user questions into Pandas operations for filtering, grouping, and analyzing uploaded CSV and Excel files
- Created **multilingual support** for all Indian regional languages, making data analysis accessible to diverse user populations across India
- Applied **fine-tuned Gemini 2.0 Flash model** to provide automated data summaries and actionable insights, empowering users to make data-driven decisions
- Engineered a **visualization system** allowing users to represent data as bar charts, pie charts, and tables that can be saved to customizable dashboards in minutes

• FRAS: Face Recognition Attendance System

November 2023 - January 2024

Tools: Python, Flask, Keras, OpenCV, K-Nearest Neighbors

- Developed a **comprehensive facial recognition solution** that automates attendance tracking, eliminating manual processes and enhancing administrative efficiency
- Implemented **OpenCV integration** for real-time face detection and recognition capable of operating reliably across diverse environments and variable lighting conditions
- Created a **machine learning model** utilizing Keras with K-Nearest Neighbors classification to accurately identify individuals while minimizing false positives
- Engineered a **responsive web interface** using Flask to provide administrators with intuitive access to attendance records and system management functions
- Designed the system with **scalability considerations** to accommodate growing user databases while maintaining rapid recognition performance

EDUCATION

• **DY Patil International University**

Computer Science and Engineering

◦ GPA: 7.1/10.0

August 2021 - June 2025

Pune, Maharashtra
